*Providing software solutions to tax professionals since 1984*

Dear Tax Professional,

As a tax professional, you understand the risk of missing a client's deadline.

Just one slip up can mean expensive penalties, angry clients and lost business.

Yet being an accountant and CPA myself, I realize how overwhelming it can be to keep track of all your clients' deadlines.

This is why I invite you to try my File In Time™ software - at my risk for one year.

Designed by TimeValue Software, a leading provider of software for tax professionals since 1984, File In Time ~~virtually eliminates the risk of missing filing deadlines.~~

File In Time is specifically designed to help tax professionals track multiple filing dates, extension deadlines, quarterly returns, audits, client meetings, and other important events.

Due dates and extension dates for nearly 200 federal and state tax forms are built into the program.

Plus you can create custom services to track special filings, audits, meetings and other important events.

But File In Time does more than store information. The software makes it easy to get the information you need.

You can sort your information by client, service, due date, job status, or staff assignments. Then you can easily update the information, extend returns, or roll tasks forward to the next due date.

With File In Time, you can also create and print reports in seconds.
